

How to stay safe online

EasyRead version

When you go **online**, there can be some dangers.

These include scammers who try to steal your information. Or you may see some pictures or films that upset you.

A **scam** is a trick. People who trick others online users are called **scammers**.

An email scam is an email that comes from someone you don't know and asks for personal information. Or the email can ask you to click on a link to a website that is unsafe.

To be safe, only open emails, or click on links when you know who sent the email.

Some websites ask you to register a **username** and **password**. You can make a password safe by adding a letter, a number and a symbol like % or ^.

Remembering passwords can be hard. It is important to keep your passwords private. Only share your passwords or bank details with someone that you really know and trust.

Be careful about sharing private information online. You can find out more about being safe online here:
